

A Simple Security Checklist for Nonprofits Project Checklist

Use this as a starting point for reviewing your website's security:

- ☐ HTTPS/SSL is active and current
- ☐ CMS, plugins, themes, and server software are updated
- ☐ Unused plugins and themes have been removed
- ☐ Administrator accounts are reviewed regularly
- ☐ Strong passwords and 2FA are enabled
- ☐ Website backups run regularly
- ☐ Backups are stored separately from the live website
- ☐ Backups have been tested for restoration
- ☐ Domain and DNS accounts are secured
- ☐ Website uptime and security are monitored
- ☐ Forms and donation tools collect only necessary information
- ☐ Third-party integrations are reviewed
- ☐ Your team knows who to contact during a website emergency
